P-20462 Preliminary Amendment 1/21/04

## IN THE ABSTRACT:

## **ABSTRACT**

A medical electrical lead includes a conductive component coupling a coil to a wire or cable; the conductive component includes a first side, a second side, a first groove formed in the first side and a second groove formed in the second side and extending approximately perpendicular to the first groove. The first groove holds a portion of the cable and the second groove holds a portion of the coil.
